(showing double or more durability on decks)

Envirolast XT (old)

Worn spots!

Envirolast XT2

Zero wear!

	XT	XT2
Durability <small>(better color retention, lower darkening & less erosion)</small>	★★	★★★★
Dirt Pick Up Resistance	★★	★★★★
Early Water Resistance	★★	★★★★
Chemical Resistance	★★★★	★★★★
Faster Recoat Time	★★	★★★★
Aspect on wood <small>(consistent film appearance on wood with variations)</small>	★★	★★★★

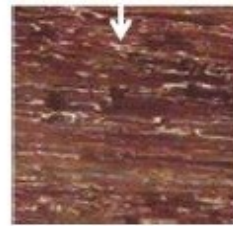

1000hr Xenon Weather-O-Meter Testing

XT (old)

Durability +
Exposed Wood
Water Res 1'

XT 2 (new)

Durability +++
Full Protection
Water Res > 60'

Easy to Apply & Maintain:

- Faster recoat time allows projects to be completed in a day
- Coating does not peel or flake, reducing the need to sand or chemically strip before repainting

Major Improvements
Seen in Weather-ability on
Exposed Decking!

Superior Weathering & Durability:

- Up to 2.0x improvement in wood protection than commercial waterborne systems
- Coatings last longer, retain color better, experience less darkening and flexes with wood
- "Real World" Performance Tested

Excellent Wood Penetration:

- Coating goes deep into wood surface protecting against discoloration, cracking, peeling
- Effective on wide variety of wood species
- Alkyd beautifies and enhances the natural beauty of wood rather than hiding it
